Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 14-16 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 14-16 and 19-22 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent no. 6,416,890, Terneu et al.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Terneu et al disclose a solar control coated glass having a conductive or semi-conductive film, which are oxides, with an undercoat layer placed between the substrate and the film.

Art Unit: 1775

Wherein the undercoat can be one or more of aluminum oxynitride, tin oxide, antimony doped tin oxide, or fluorine doped tin oxide, (column 3, lines 48-58). The undercoat layer has a thickness in the range of 15-90 nm (150-900 Å), meeting the requirements of claims 14-16 and 19-22, (column 3, lines 64-65).

A chemical composition and its properties are inseparable. *MPEP 2112.02*. Absent an evidentiary showing to the contrary that applicant's claimed invention provides unexpected results over the prior art, the addition of the refractive index to the claim language, fails to provide patentable distinction over the prior art.

The process limitation, "deposited by gas-phase pyrolysis," does not provide patentable distinction over the prior art absent an evidentiary showing to the contrary demonstrating unexpected results between the claimed invention and the prior art.

Allowable Subject Matter

4. Claims 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record do not teach or suggest the composition of the aluminum oxynitride as required in claims 17 and 18.
